

Welcome **the new 3.0 pool**

Welcome **the new 3.0 pool**

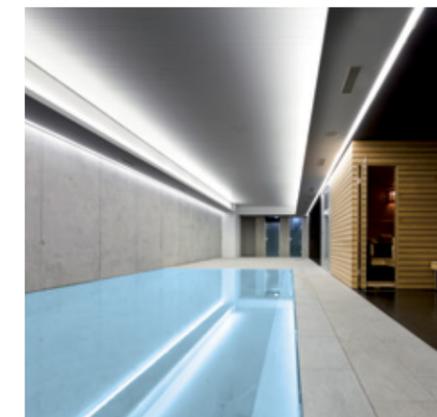

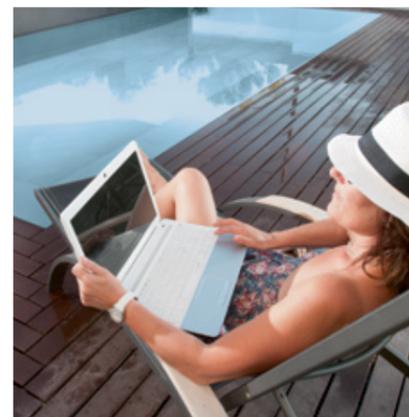

A premium product for the premiere customer.

Welcome the new 3.0 pool

A premium product for the premiere customer.

The most highly advanced innovation.

At AstralPool we have created a new maintenance and control concept for your pool: AstralPool Mac®. A revolutionary concept and the only one of its kind in the market. Innovation translated into perfect harmony, a perfect clean and ideal maintenance: an advance that will revolutionise the pool sector.

The pleasure of the good things in life.

The pleasure of the good things in life, convenience of use and the feeling of having the best product available in the market are not synonymous with luxury but rather good taste. With AstralPool Mac®, we make it easy for you to achieve a modern, comfortable and functional lifestyle in your home, in your entertainment and relaxation space, at your pool. Because having AstralPool Mac® means more than that; it means being first with the latest. It's not only about wanting and knowing how to set yourself apart from the rest; it's the pleasure of comfort and modernity at once. The solution of the future for your pool, with the best features and service in the market. This is a product for people who appreciate the quality of a good product and good service and who place a premium on convenience and feeling unique in their plenitude.

A revolution for your pool

recognised innovation and quality.

Innovation

Astralpool launches a unique product in the market, creating a new concept for pools, a veritable world revolution. Winner of the Reddot 2013 design award which recognised the quality and innovation of the AstralPool Mac®.

reddot design award
honourable mention 2013

Total Pool Control

Total Control

Easy to use. Controls all of the pool's parameters (efficiency level, filtration, dosing, temperature) in the most efficient possible way.

Advanced Integration

Compact and modular. AstralPool Mac® is designed for physical and chemical pool treatments.

PCT patent pending

A revolution for your pool

Energy efficiency adapted to your pool.

AstralPool Mac® adjusts to your pool. Simply entering your pool's specific parameters (volume of water in m³, number of swimmers, environment, ideal filtering time, etc.), Astralpool Mac® adapts to them, achieving the maximum performance level for energy and water savings.

AstralPool Mac® is suitable for pools up to 80m³.

Efficiency

AstralPool Mac® guarantees maximum efficiency and saves 50% on energy, 90% on chemicals and 50% backwash water compared to conventionally maintained pools.

Total Control

maximum control for maximum performance.

ORP Redox Level (ORP)
Indicates the Redox Level (ORP) of the water compared to the "set point" established as the desired value.

PH pH level
Indicates the pH level of the water compared to the "set point" established as the desired value.

NaCl Level of salt in the water
A green light indicates an ideal level of salt in the water; a red light indicates that the level of salt is low.

Temperature of the water
Indicates the current temperature of your pool. Optionally, a heat pump can be installed, which can also be controlled and adjusted on the unit's screen.

Efficiency level AstralPool Mac®
This indicator shows the efficiency level at which the AstralPool Mac® is working in relation to the parameters entered. This helps you to know if your unit is working as efficiently as possible.

Clean Hibernate Help

main smart manager scheduler manual mode setup

Total Pool Control

Total Control

5" high resolution touch screen.

Filtration

Manual or automatic control of the entire filtering process. Capable of backwashing the filter when it needs it and knowing when it needs to work intensively in order to keep the water in perfect condition (automatic water recovery mode). In manual mode, the habitual functions of a conventional system can be performed in those cases where this is necessary. The AstralPool Mac® filtering system works at different speeds for water and power savings of 50%.

Dosing

Enjoy crystal clear water with just the right amount of chlorine thanks to the saline electrolysis with ORP control and automatic pH adjustment. AstralPool Mac® helps you reduce the amount of chemicals needed by more than 90%.

Heating (optional)

AstralPool Mac® has a "by-pass" that allows a heat pump to be installed and prevents the water treated by salt electrolysis to pass through the heat pump. It is equipped with Modbus communications that allow you to control the heat pump from the AstralPool Mac® screen.

Smart Manager

Exclusive and innovative intelligent software that chooses the specifications and parameters of your pool and AstralPool Mac® automatically adjusts all of the parameters in order to manage the physical and chemical treatment of your pool.

AstralPool MAC[®] Climate

regulating water temperature

AstralPool MAC[®] climate control

The **APM climate control kit*** can:

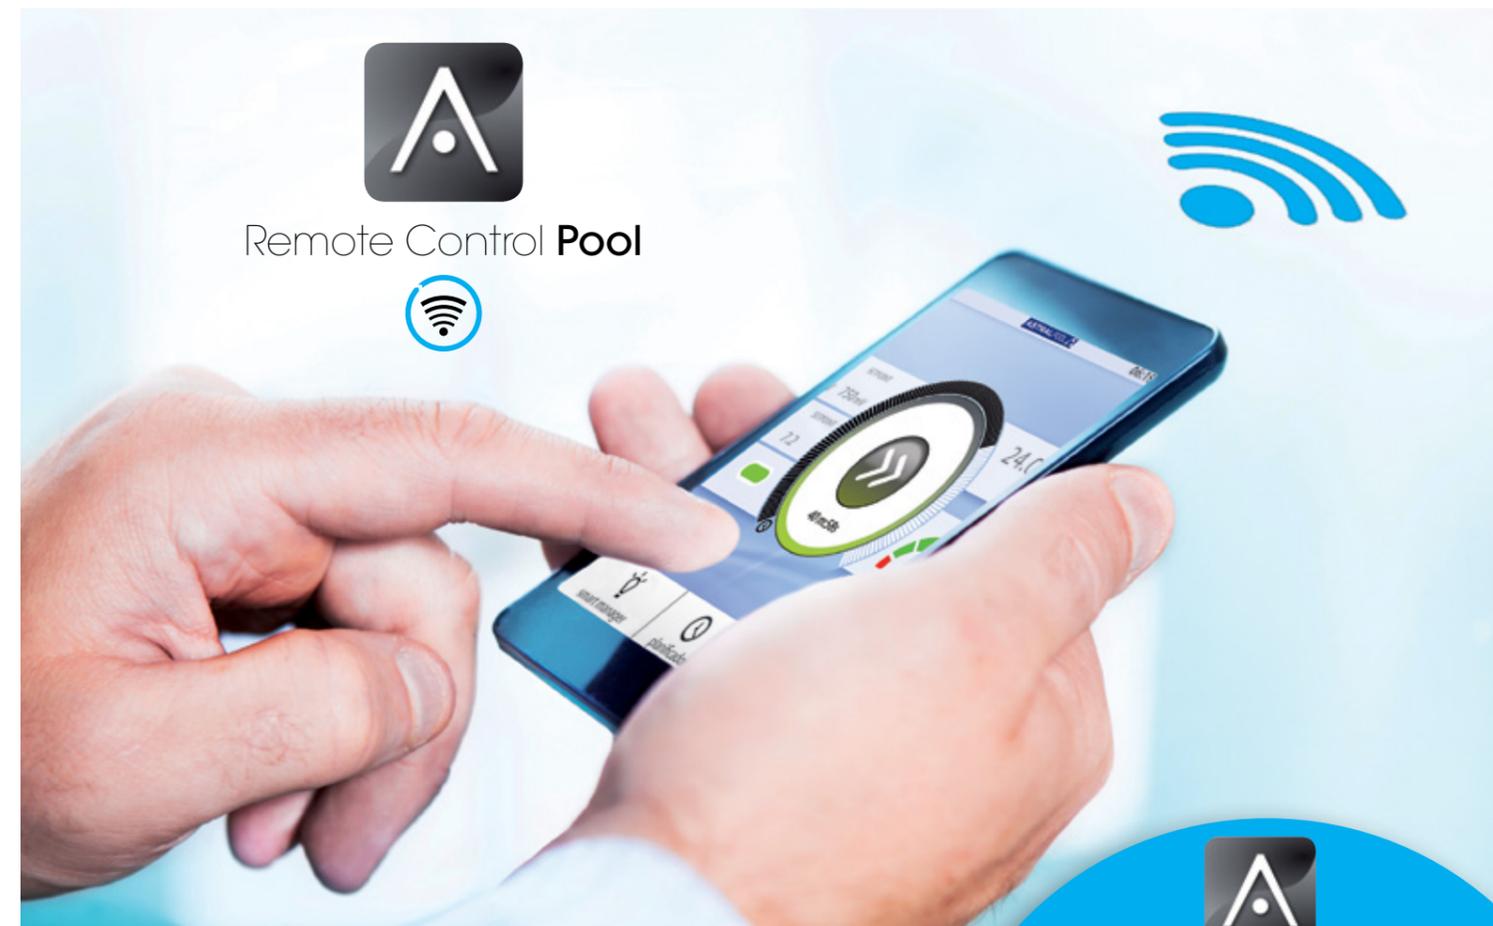

- Regulate the temperature of your swimming pool from AstralPool MAC[®].
- Run the heating system in Comfort or Eco mode, even if it doesn't have this setting.

It is compatible with:

- Any kind of heating system (heat pump, gas boiler, heat exchanger, etc.).

AstralPool MAC[®] app

total control from your mobile device

AstralPool MAC[®] has a mobile app for controlling your temperature system. The AstralPool MAC app is the next step in remote control technology, as it not only works on WiFi, but also stays fully connected to our Fluidra Connect platform.

The AstralPool MAC app is compatible with Android and iOS devices.

* Not included as standard in AstralPool MAC[®]

* Check the availability of the Fluidra Connect platform in your country. For further information, visit www.fluidraconnect.com
